Logging In with Multifactor Authentication (MFA)

1. After the installation has finished, open an Office application (Word, PowerPoint, Excel, etc.) to sign in. The login prompt may appear on its own as well.
2. At the top right corner of the window, click “Sign in”.

3. Enter your company email address and password, then click “Sign in”

4. If you are set up with MFA, you will be asked to approve the sign in through the Authenticator, choose the “Approve a request on my Microsoft Authenticator app”.

Approve on your phone once you receive the request.

5. When asked to use this account everywhere on your device, make sure “Allow my organization to manage my device” is checked. Then click “Yes”.

6. Close the application and reopen it, making sure that the account stays logged in.

Initial Set up for Multifactor Authentication (MFA)

1. When you sign into your office account for the first time you will be prompted to set up Multifactor Authentication.
 - you will first see a window asking for more information where you will click next.

- For the next step you will see a drop down where you need to choose “Mobile app”, make sure you have “Receive notifications for verification” checked,

then click “Set up”.

- You will then be prompted with a QR code at this point you will need your phone to finish setup.

2. You can download the Authenticator app from the [Apple Store](#) or [Google Play Store](#)

- 4. You will be taken back to this page, but now “Set up” is now grey and here you can select “Next”.

The screenshot shows the Microsoft account security verification page. At the top left is the Microsoft logo. The main heading is "Additional security verification". Below it is a sub-heading "Secure your account by adding phone verification to your password. View video to know how to secure your account". The current step is "Step 1: How should we contact you?". There is a dropdown menu set to "Mobile app". Below that is a section "How do you want to use the mobile app?" with two radio button options: "Receive notifications for verification" (which is selected) and "Use verification code". A note states "To use these verification methods, you must set up the Microsoft Authenticator app." There is a grey "Set up" button and a blue "Next" button (highlighted with a red box). At the bottom left, there is a footer with "©2021 Microsoft Legal | Privacy".

- 5. You will be asked to enter your phone number for additional security verification, then

The screenshot shows the Microsoft account security verification page. At the top left is the Microsoft logo. The main heading is "Additional security verification". Below it is a sub-heading "Secure your account by adding phone verification to your password. View video to know how to secure your account". The current step is "Step 3: In case you lose access to the mobile app". There is a dropdown menu set to "United States (+1)" and a text input field for the phone number. A note states "Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply." There is a blue "Next" button (highlighted with a red box). At the bottom left, there is a footer with "©2021 Microsoft Legal | Privacy".

hit “Next”.

- Final screen will provide an app password which will be saved to your office account.

- Now that you are setup when you login to office.com you will be prompted with choosing a verification method, the first two options are for the app either sending you a notification for all you have to do is click "Approve" which is the easiest process, or the second option needs you to open the app and enter the 6 digit code provided.
